## Introduction:

Nigeria is a land of great promise and massive potentials. The land boasts of 70m hectares of arable land, a very vibrant and youthful population, a clement weather condition almost all year round. Agriculture in Nigeria contributes about 40% to the nation's GDP employing a substantial number of its rural population in Agriculture, but then why is Nigeria not taking its rightful place amongst the comity of global leaders in food production we may ask? The answer is simple, there are known gaps in the policies of Government relating to Food Security, there are known incidents of insecurity across the nation with farmers being chased out of their farms, the remaining ones are already aging, consequences of age-long unsustainable farming practices that is substantially subsistent at best, and there is no strategic path to encourage or incentivize the younger generation to take over the farms. So, the plain truth is that Hunger is looming and to feed 220 million Nigerians (soon to double by 2050) sustainably is indeed a big challenge.

**NAIJA FOODS & DRINKS FIESTA 2025** will be a side show at the AGRISUMMEX 2025, a display of the unique culinary enterprises in Nigeria. Visitors and Participants treated to an array of local and international exquisite cuisine and beverages that celebrates the journey from the Farm to the Kitchen.

The Nigeria's International Agriculture Summit and Exhibition 2024 aims to bring together key stakeholders, experts, policymakers, researchers, industry leaders, and investors from around the world to discuss and explore innovative solutions to boost agricultural productivity and food security. The event will focus on the critical role of government policies, technologies, industrialization, and investments in driving sustainable agricultural growth and prosperous future for all Nigerians.

# Objectives:

- **Foster knowledge exchange:** Facilitate the exchange of ideas, experiences, and best practices among participants to promote innovation and collaboration in the agricultural sector.
- **Highlight government policies:** Showcase successful policies and initiatives implemented by governments to support agricultural development, including incentives, subsidies, land reforms, and regulatory frameworks. Explore technological advancements: Discuss the latest advancements in agricultural technologies, precision farming, automation, remote sensing, artificial intelligence, and data analytics to improve productivity, efficiency, and sustainability.
- **Emphasize industrialization:** Explore the potential for industrialization and value addition in agriculture by promoting agro-processing, storage, transportation, and distribution systems to reduce post-harvest losses and enhance value chains.
- **Encourage investment:** Encourage public and private sector investment in agriculture, including financial institutions, venture capitalists, impact investors, and philanthropic to support research, innovation, organizations, infrastructure development, and capacity building.

The Summit and Exhibition will cover a wide range of themes and topics related to boosting agricultural productivity. Some areas of focus include:

- |   |   |
|---|---|
| i. Government Policies<br>ii. Technology and Innovation | iii. Industrialization and Value Addition<br>iv. Investment and Financing |
|---|---|
- **Event Format:** The Nigeria's International Agriculture Summit and Exhibition 2024 will consist of **plenary sessions, panel discussions, technical workshops, interactive sessions, and an exhibition showcasing cutting-edge technologies**, innovative products, and success stories from different regions. The event will provide ample networking opportunities for participants to connect with industry experts, policymakers, investors, and potential partners

## vi. Target Participants:

The event will attract participants from various sectors, including:

- Government officials and policymakers
- Agricultural researchers and scientists
- Industry leaders, entrepreneurs and association
- Technology providers and innovators
- Financial institutions and investors
- Development organizations and NGOs
- Farmers and farmer organizations
- Academics and educational institutions
- International organizations and agencies
- Agro-processing organization
- Agro-Chemical organizations
- Agro-Equipment Suppliers

## vii. Expected Outcomes:

- Enhanced understanding of successful government policies and initiatives to boost agricultural productivity in Nigeria.
- Increased awareness of technological advancements and their potential to transform the agricultural sector.
- Identification of investment opportunities and partnerships for sustainable agricultural development.
- Strengthened collaboration among stakeholders and regions to promote knowledge sharing and innovation.
- Development of policy recommendations and action plans to address challenges and harness opportunities in agriculture.

## Program of Events

Bank : Fidelity Bank Plc.

Account Number: 4010461272

**Early Birds Discount 10% on all payments (1st October - 30th November, 2024)**

**Deadline for all payments (30th December, 2024)**

## **Securing Nigeria's Agribusiness towards Food Security and a Prosperous Future.**

Nigeria today faces two major challenges in agriculture: an inability to meet domestic food needs and an inability to export at the quality level necessary for market success. The first problem is a productivity challenge caused by a largely inefficient input system and agricultural model. As a result, an ageing population of farmers does not have enough seeds, fertilisers, irrigation, crop protection and related support to be successful. The latter challenge is driven by an equally inefficient system for setting and enforcing food quality standards and a lack of knowledge of the target markets. Insufficient food testing facilities, a weak inspection system and poor coordination between the competent federal authorities lead to problems at an early stage, such as a lack of knowledge of the permissible pollutant contents.

To put the Nigerian agricultural sector on a growth path, measures are needed to fill these two gaps: to produce enough fresh, high quality food for the Nigerian market and to successfully serve the export market and earn foreign exchange.
